Implant Secured Dentures will make you feel more confident!

Millions of people around the world are missing all their teeth in their upper or lower jaw. Many of them struggle to keep their dentures secure.

Dentures become loose over a period of time because the bone begins to recede away. This means that your original denture no longer fits the mouth as well as it once did. This can lead to numerous problems such as ulcers that make the dentures uncomfortable and inability to chew and enjoy food.

We find our patients can find loose dentures embarrassing and are afraid to talk about it.

Every conversation with your dentist is confidential, we are here to help so you can enjoy the confidence that comes with a secure, perfect smile.

If you are embarrassed about loose dentures, not being able to eat the foods that you love and fed up with denture adhesives; there is now a way to make your dentures work for you and it's called denture stabilisation, this uses dental implants to fix and secure the dentures in place.

The benefits of denture stabilisation include:

- Restores proper chewing, allowing a better diet and improved health
- Improves speech and confidence
- Increases comfort with less irritation
- Ends the cost and inconvenience of denture adhesives
- Minimally invasive procedure
- They are fixed in your mouth, so you don't take them out at night
- They don't move around your mouth like conventional dentures
- They don't get loose
- It's a great long-term solution for missing teeth
- You can create a cosmetically enhanced smile
- Your new teeth will look like natural teeth
- You will be able to eat and chew your food comfortably and without embarrassment
- Your mouth will look younger again!

To make a change to your life today and discuss denture stabilisation for you or a family member please contact us and make an appointment for a consultation. We look forward to the opportunity to change the way you think about your dentures!

Get to know us.. meet Jen and Trevor

Jennifer and Trevor studied dentistry together and graduated from Dundee University in 1992.

Trevor returned to Northern Ireland in 1994 bringing Jennifer with him. When they are not working, they spend all their spare time with their two children, James and Georgia and a lovely circle of friends and family.

Most weekends are spent out in the middle of the Irish sea, weather permitting Strangford Lough or even a quick run over to Scotland for lunch. If it's not fishing, then scouts, swimming, tennis and children's parties or dinner with friends and family take up the rest of their time.

Jen and Trevor are the Principal Dentists at Ballyclare Dental Practice.

Straight Teeth Less Time. Clear Braces.

Are you one of the millions of adults who are unhappy, self-conscious or even embarrassed by your smile?

Many people spend their entire lives covering their mouths when they laugh, smile or talk.

They feel stuck because they do not want to wear metal braces for years or they are concerned that other corrective procedures could be too invasive or too expensive. Now at Ballyclare Dental, there is an effective, safe and affordable cosmetic solution that fits your lifestyle!

A revolutionary combination of proven orthodontic techniques, modern materials, and innovative

thought - Six Month Smiles® utilises specialized clear braces to gently straighten and align teeth in an average time of just six months!

To book a consultation with Jen for Six Month Smiles, phone 028 9335 2805. Check out the Six Month Smiles website for real patient stories!
