

Treatments to make you smile.

At Ballyclare Dental Practice we are dedicated to making your smile straight, white and contoured. Giving you every reason to smile!

Teeth Whitening

Whether you want to add sparkle to your smile for your wedding day or perfect your look for business meetings, whitening is simple, affordable and safe.

Veneers

Veneers are simple solutions to broken, discoloured and uneven teeth. Veneers are very thin, specially shaped pieces of porcelain that are attached to the front of your teeth to create a beautiful smile.

Crowns and Bridges

Crowns and bridges are used to restore broken, missing, discoloured and uneven teeth where strength is required.

Dentures

We can replace dentures which are looking tired and worn with high quality teeth and materials.

Here is the result achieved on one of our patients, with straighten, whiten and contour. Simple yet stunning.

White Fillings

Replace unsightly mercury fillings with natural coloured fillings to improve the look of your smile.

Cosmetic Contouring

Cosmetic contouring is a quick and simple way to reshape and tidy your smile. Smoothing minor chips, reshaping pointed teeth or redefine flat teeth.

Dental Implants

Implants are a modern way to replace missing teeth and a permanent solution to tooth loss.

Invisible Tooth Straightening

To put it simply, an easy way of achieving a beautiful smile invisibly.

Out of hours and contact.

Emergency Treatment

If you have a dental problem that requires urgent attention please contact us as early in the day as you can. If you are in pain we will do our best to see you the same day if possible.

Our of Hours

Please telephone the practice and a recorded message will give further information on how to access advice and treatment in the event of a dental emergency. Alternatively please check our website for advice www.ballyclaredental.com

Parking

There is parking available on the street outside the practice and also in the town square car park which approximately 50 yards away.

BALLYCLARE DENTAL PRACTICE

SMILE

Welcome to our practice.

If you are looking for a relaxed dental experience and reassurance you are being treated by skilled dentists, **welcome.**

We have a team of 4 dentists and 2 dental hygienists led by husband and wife team of Trevor & Jennifer McKissick. We understand the importance of a healthy smile. After all teeth are one of the first things we notice about a person!

We believe that a healthy smile can make a huge difference to the confidence of our patients... they smile more because they can and they want to!

It all starts with a healthy smile...

First off... its all about the importance of your own dental health, that's where we work with you to achieve optimum dental health.

Next... we will explain to you using the latest technology just what can be achieved if you wish to make some gentle alterations to your smile.

Finally... we ensure you stay dentally healthy through a regular maintenance routine.

In short its all about you...

Our focus is our patient simply tell us what you would like from us and we will work with you to achieve it!

Your first visit new patients.

Your initial visit is very important to us. It gives us an opportunity to get to know each other and determine what you wish us to accomplish with your dental health and your smile.

Your first visit with us will take approximately 30 minutes. We ask all patients coming in to see us to arrive a few minutes earlier than your appointment time as we need you to complete a medical history form and smile questionnaire.

Whilst completing these forms our reception team will offer you a relaxing cup of tea or coffee.

Upon completion of the forms, your chosen dentist will meet you at reception.

The dentist will then analyse some key areas and discuss you the following:

- The existing condition of your teeth
- Areas of concern
- Gum Health condition

- Oral cancer screening
- Assessment of your smile
- Assessment of your jaw joint (TMJ)
- Assessment of your occlusion (the way your teeth bite together)

After the assessment your dentist will discuss essential dental health and any areas that may need treatment, they will also discuss any cosmetic options which will enhance your smile.

We believe that by the end of this visit you will know more about your smile than ever before.

Our patients are very important to us and your first visit is key in getting to know you!

*Pop in and take a look any time!
We always welcome referrals
if you think someone you know
may like our practice.*

Our tailored dental plans.

We strongly believe that once our patients are happily settled with their individual dentist and hygiene team the most important next step is becoming a full member of the practice.

We are one of only a handful of the practices in the province to have designed and implemented our own dental membership plan.

The main reason we have implemented this plan is to reward loyal patients with lower prices.

We have analysed our patient base over the last few years and can say with some confidence that those on our dental plan have:

- Fewer fillings
- Less dental decay
- Less likelihood of toothache
- More attractive teeth
- More choice
- Benefited from reduced costs

You will benefit from close dental health monitoring by the dental team & dental hygiene team. This ensures you have a healthy mouth and a health smile for life.

Our practice membership scheme includes all the necessary independent dental health checks and hygiene visits each year.

If you then require essential dental treatment or as many people wish to, opt for cosmetic dental options you will benefit from prices that are 20% lower!

Ensure your dental health by asking your dentist for details of how to become a member of our dental plan.

Our patients are always pleasantly surprised at how easy it is to be truly happy with your smile and dental health.
