

Smile, speak & eat with confidence

Comfort Fit Dentures

It may surprise you, but 69% of adults aged 35 to 44 have lost at least one tooth to an accident, gum disease, a failed root canal or tooth decay. By age 74, about a quarter of all adults has lost all of their permanent teeth.

Dentures have changed dramatically over the years. Today's dentures are made after precise measurements, they are then custom-made to snugly fit to your mouth and can restore both the ability to chew through

tough food and give you your smile back.

As well as your own teeth, proper care of dentures is important too. Dentures should be stored in water in a safe place. They should also be replaced every five years

Speak to your dentist at Ballyclare Dental if you are due to renew your dentures or if you would to find out more about the new denture options available.

IN THIS ISSUE:

- 1 Smile, speak & eat with confidence
- 2 Trouble Sleeping?
- 3 Popular treatments
- 4 Membership only from £13!

Get to know us.. meet Janice Robinson

Janice started as a dental nurse 22 years ago and worked her way up the team to become Aunty J.

At home Janice is a proud granny!

At the weekends she morphs into 'Barbara from The Good Life' spending time with her vegetables and chickens.

Janice is the Practice Co-Ordinator at Ballyclare Dental Practice.

If you're stuck between a rock and a hard place just smile!

Do you need a good nights sleep?

Let Ballyclare Dental help you solve your snoring or sleep apnoea problem.

By taking a simple mould of your teeth we can custom make an appliance that is worn as you sleep.

The appliance gently alters the position of your jaw and so your tongue rests as you sleep, allowing for more air to reach the airways and less noise!

Our sleep device has a number of important key features including maximum comfort and fit. It is produced by specially trained dentists.

There are a number of benefits to having a custom made sleep appliance.

- Customised to your mouth for maximum comfort.
- Highly successful - reported success in reducing snoring.
- Robust but slim line.
- Prevents tooth damage from clenching/grinding.

Call reception on 028 9335 2805 to ask for further details.
